REMARKS

25X1

1. The airfield of Medias (R 36/R 44), is located on the eastern outskirts of the town between the railroad line and the river. The landing field was level grass land. No runways or taxiways were available. A schoolhouse, a workshop and a hanger were located at the western border of the field.
2. The airfield was occupied only by a "Preparatory Technical Air Force School". During the past years regular training flights by a small number of monoplane were observed. *

25X1

* Comment. The report indicates that the airfield of Medias has not been enlarged or improved. A pilot school is believed to be stationed there. The "Preparatory Technical Air Force School" is reported for the first time. This school is possibly located in the buildings of the former Icar plants on the southern edge of the field.
